Precision Power International's IPPS Online Catalog Updated to Reflect New OEM Product Offerings

Continuing to match its Instrumentation Power Protection Systems (IPPS) products with contemporary instrumentation system releases, PPI updates online catalog at the request of multiple OEM distributors and customers for numerous life science and other laboratory applications.

Mission Viejo, CA – To keep in step with new OEM product offerings within the life science and laboratory marketplaces, Precision Power International, Inc. (PPI), which delivers high-level, global engineering solutions, including the design of critical power products and services for technology business applications, has updated its Instrument Power Protection System (IPPS) Online Catalog to reflect the latest in mass spectroscopy (MS) Tandem and Triple TOF MALDI instrumentation and research equipment. PPI has added numerous complementary IPPS solutions for noted OEMs including Bio-Rad, Roche, PerkinElmer, Ventana Medical Systems, and AB SCIEX.

The online catalog can be accessed by visiting:

www.precisionpowerinternational.com/onlinecatalog.php.

This comprehensive resource enables visitors to quickly determine exactly which IPPS they need to protect their costly and sensitive laboratory instrumentation. Visitors are also able to download Specification Data Sheets (SDS) as reference materials. These SDS include both UL and CE-marked product applications for the various instruments. The SDS defines the specific instrument application; the IPPS catalog number and certification standards for effortless product selection.

Currently, the Online Catalog contains hundreds of GC, GC-MS, Genomic/Proteomic (DNA), LC, LC-MS, ICP, ICP-MS, SEM and XRF instruments from Applied Biosystems (Life Technologies), AB SCIEX, Dionex, FEI Company, Illumina (Solexa), NuAire, Oxford Instruments, Peak Scientific, PerkinElmer, Protodyne Corp (Lab Corp), Roche, Shimadzu, So-Low, and Thermo Fisher Scientific. More instrument IPPS and SDS are added as the product offerings in the marketplace evolve.

Continued

“Our goal with this Online Catalog,” explains Raymond L. Hecker, principle, PPI, “is to provide our current and future customers with all the information they need to easily protect their laboratory investments. We keep in constant contact with our OEM partners and distribution team to ensure that we have IPPS for all key product offerings. We are proud to work so closely with the major players in the industry.”

Precision Power International, Inc. (PPI) is an engineering consultant, product developer, and system integrator of energy and power products. The company specializes in value added systems engineering (VASE), software monitoring services (SMS), and consulting engineering services (CES) for the global energy, power technology, and large end-user technology markets. PPI offers “true” turnkey systems integration with “plug and play” designs for the scientific, technology specifier and end user applications. PPI’s engineers design, integrate and certify product applications utilizing the best and most robust “world-class” technology available.
